## **BIOPROCESSING**

APRIL 7, 2021

| Date  | Time                      | Track                      | Presentation Title   | Speaker  |
|-------|---------------------------|----------------------------|--|--|
| 7-Apr | 07:30<br>-<br>08:30<br>AM | Downstream<br>Processing   | Keynote Presentation: A Convenient Self-Cleaving Affinity Tag<br>for Research and Manufacturing Applications     | David Wood<br>Professor, Chemical and Biomolecular Engineering, Ohio<br>State University   |
| 7-Apr | 09:00<br>-<br>10:00<br>AM | Upstream<br>Processing     | Keynote Presentation: Doing more with less - Maximizing<br>Phase Appropriate DOE Strategies                      | Patricia McNeill<br>Associate Director, Culture Development Seattle Cell<br>Culture Development, Lundbeck Seattle<br>BioPharmaceuticals, Inc                               |
| 7-Apr | 10:30<br>-<br>11:30<br>AM |                            | An Evolution in Disposable Solutions   | Buzz Lobbezoo<br>Product Support and Development Manager at Astrea<br>Bioseparations Ltd.  |
| 7-Apr | 12:00<br>-<br>01:00<br>PM |                            | Optimizing Transfection to Generate High-Titer AAV and Lentiviral Vectors  | Sandy Tseng, PhD<br>Technical Support Scientist (Mirus Bio)  |
| 7-Apr | 12:00<br>-<br>12:45<br>AM | Upstream<br>Processing     | A Chinese hamster transcription start site atlas that enables targeted editing of CHO cells                      | Isaac Shamie<br>PhD Candidate, Bioinformatics & Systems Biology,<br>University of California, San Diego  |
| 7-Apr | 12:00<br>-<br>12:45<br>AM | Manufacturing              | A Next Generation Simulation Tool for the Characterization and Optimization of gassed and/or stirred Bioreactors | Christian Witz, Ph.D.<br>Head of the Computational Bioprocess Engineering<br>Group at the Institute for Process and Particle<br>Engineering, Graz University of Technology |
| 7-Apr | 12:00<br>-<br>12:45<br>AM | Cell and Gene<br>Therapies | Anti-fibrotic materials for immunoprotected cell-based therapies   | Matthew Bochenek, PhD<br>Post-doctoral Fellow Boston Children's Hospital -<br>Harvard; Affiliate researcher - MIT  |

| 7-Apr | 12:00<br>-<br>12:45<br>AM | Upstream<br>Processing     | Characterisation and Scale Translation of a parallel<br>Microbioreactor System for Cell Culture Process Development   | Frank Baganz, PhD<br>Associate Professor in Fermentation and Cell Culture,<br>Department of Biochemical Engineering University<br>College London                                      |
|-------|---------------------------|----------------------------|---|---|
| 7-Apr | 12:00<br>-<br>12:45<br>AM | Cell and Gene<br>Therapies | Development of Potency Assays for Cell and Gene Therapy   | Nagarjun Kasaraneni, PhD<br>Scientist, Technical Operations, Sana Biotechnology   |
| 7-Apr | 12:00<br>-<br>12:45<br>AM | Manufacturing              | From experiments, data, hybrid models, and digital twins.<br>Several up- and downstream success stories highlighting the<br>benefits of using advanced process modeling | Mark Dürkop, PhD<br>CEO Novasign GmbH, Project Lead BOKU - Department<br>of Biotechnology, University of Natural Resources and<br>Life Sciences, Vienna                               |
| 7-Apr | 12:00<br>-<br>12:45<br>PM | Downstream<br>Processing   | Model-based Control for Continuous Viral Inactivation of<br>Biopharmaceuticals  | Moo Sun Hong, MS<br>Researcher at the Massachusetts Institute of<br>Technology (MIT)  |
| 7-Apr | 12:00<br>-<br>12:45<br>AM | Upstream<br>Processing     | Model-Based Design of Mammalian Cell Culture Media:<br>Demonstration for GS-NS0 Cell Line   | Sakis Mantalaris, PhD, FAIMBE<br>Professor, BioMedical Systems Engineering Laboratory,<br>Wallace H. Coulter Department of Biomedical<br>Engineering, Georgia Institute of Technology |
| 7-Apr | 12:00<br>-<br>12:45<br>AM |                            | Niosomes as a bilayer nanocarrier for combinative drug<br>delivery  | Pratik Kulkarni, PhD<br>Research scholar, National Forensic Sciences University<br>(NFSU)   |
